

# LAZ PARKING PreScreen

Arrive with  
peace of mind.

As we begin to emerge from the COVID-19 pandemic, screening of potential risks is critical in safely moving the world forward. And LAZ Parking is ready to do our part, with an innovative new service that prescreens visitors as they arrive, before they enter a workplace or venue. Utilizing the Parsons DetectWise™ solutions powered by Vizsafe's patented Geoaware technology platform, LAZ Parking PreScreen offers powerful frontline protection and peace of mind from health threats to you, your business and your customers or employees.

## [ THE PRESCREEN PROCESS\* ]

Before visitors arrive at their destination, they will need to download a free app for user authentication and complete a short questionnaire. Once they arrive, they will park their vehicles and be instructed to visit a touchless screening kiosk. A PreScreen Squad member will greet the visitor and can assist as they scan the QR from the app and use the scanner that monitors real-time health symptoms. If they pass the health check at this checkpoint, they will be cleared to proceed to their destination.

\*All descriptions and depictions provided herein are for marketing purposes only, as the actual services provided and procedures followed by LAZ Parking will be agreed to by LAZ Parking and the client on an individualized basis. LAZ expressly disclaims liability resulting from any failure to follow marketing materials.

## [ AN ADVANCED SCREENING SYSTEM ]

### **RAPID ONSITE FIRST LEVEL SCREENING**

The first step in the PreScreen process allows our PreScreen Squad to quickly evaluate visitors' risk level and assign them one of two status options:

**Fail:** Visitor has a temperature higher than an agreed maximum

**Proceed:** Visitor's temperature is within an acceptable range and they can proceed to next screening step

### **PHONE APP OR WEB-BASED TOOL**

This allows the LAZ PreScreen Squad to look up visitors' current pass status, print or issue passes, or enter basic ID information for new visitors.

### **PRINTED OR ELECTRONIC PASS**

Customers who pass all screening steps are issued an electronic QR code that is good for a specified period of time. This allows them entry into the facility.

### **COMPLIANCE**

We will work with our Clients to ensure that LAZ PreScreen process meets business needs, CDC and other government safety recommendations in light of COVID-19, and applicable law.

### **LAZ is proud to partner with Parsons, VizSafe and USHealthyWork**

USHealthyWork is a leading medical consultancy group that provides expert advice and evidence-based guidance to help businesses, schools, and organizations safely return from the COVID-19 pandemic. USHealthyWork was consulted and has approved the LAZ PreScreen screening protocols and health questionnaire. Learn more about USHealthyWork at [ushealthywork.com](http://ushealthywork.com).
